INTRODUCTION

Release 25.10 delivers a set of usability enhancements, security improvements, and new feature rollouts across the FLX platform. These updates improve content visibility, streamline navigation, expand personalization options, and ensure compliance with modern web security standards.

IMPACTED USERS

Impacted Persona(s)	Impacted Section	Functionality
All Users	Waffle Menu	New **Help Center** button for quick access to FLX Help resources
All Users	Backend Security	Implementation of HTTP security headers for enhanced client-server protection
WM, WME, AM, AME, DP, Advisor, FLX Team	Company Profile	Enhanced **About** section display with expanded default height
WM Admin, FLX	Pillar Management	**Pillar Contacts – Edit Appearance**: Drag-and-drop ordering for contact display
WM Admin, AM Admin, DP, AE, FLX	Admin Panel / People	Introduction of Job Title field for all personas
WM, WME	Reporting > My Folders / Partner Folders	Enhanced folder search to include all subfolders in both views

RELEASE SCOPE DETAILS

The scope of the release includes the following items:

Platform Category	Feature	Description / Details
Company Profile	About Section Display Enhancement	Increases the default height of the About section on WM profiles from 3 to 13 lines (when no video is embedded) before truncating with a "Read More" button. If a video is present, the section remains at 3 lines below the video. Improves visibility without extra clicks while preserving layout integrity.
Backend Security	HTTP Security Headers Implementation	Introduces key HTTP security headers via NGINX, including Content-Security-Policy, X-Frame-Options, X-Content-Type-Options, Referrer-Policy, and Permissions-Policy. Aligns with OWASP best practices and mitigates risks like clickjacking, XSS, MIME-sniffing, and information leakage.
Pillar Management	Editing Appearance (Order of Display)	Adds a drag-and-drop ordering interface under the "Edit Appearance" tab in the Share Pillar Access modal. WM Admins and FLX users can control the visual order of Pillar Contacts on the Pillar Overview page.

Pillar Management	Archived Updates Pinning Restriction	When an update is archived, carousel pinning options are now hidden from the UI. Archived content cannot be pinned or displayed in carousels, ensuring clarity and preventing outdated content from appearing in featured areas.
Admin Panel / People	Job Title Field for All Personas	Introduces an optional "Job Title" field for all user types (WME, AME, Advisor, DP, FLX Team) in both Add and Edit Employee modals. Titles display beneath names on People cards and Pillar Contacts where available.
Reporting	Enhanced Folder Search	Upgrades My Folders and Partner Folders search to include **all nested subfolders**. Search results appear in a dedicated results view, consistent in both List and Grid views, and maintain full contextual actions like view and download.
Navigation	Help Center Button in Waffle Menu	Adds a "Help Center" button to the bottom of the waffle menu for quick access to the FLX Help Center URL in a new browser tab. Available to all personas without permission gating.

What's Next

The following changes are planned for future releases:

- Launchpad Api integration.
- Customizable Launchpad.
